Ms. Lisa Lane/Ms. Susan Erdman
Andersen Consulting
Chicago, IL

Via fax: 312-507-1043

Dear Lisa and Susan:

Thank you again for arranging the very useful meeting in Chicago last week. It certainly helped me to clarify your needs.

I have attached two proposals

- A "quantitative" one, which also includes an option for the material which could be prepared subsequent to January 15. I set this latter date to be February 15, but it could be adjusted.
- A "qualitative" study, whose issues could be modified or expanded somewhat without any effect on time or cost.

Please call me if you have any questions or comments.

Sincerely,

Thomas O'Flaherty
Vice President

Fax: 201-801-0441

PROVIDING QUANTITATIVE INFORMATION ON APPLICATION SOFTWARE AND SERVICES MARKETS

I. BACKGROUND AND OBJECTIVES

Andersen Consulting has requested that INPUT provide quantitative data on software and services in several vertical markets.

- Attachment 1 shows the data requested (asterisked items)
- Attachment 2 shows Andersen's prioritization of its data needs
- Attachment 3 defines the vertical markets, primarily by SIC codes

The materials above and the contents of this proposal were reviewed by Andersen and INPUT at a meeting in Chicago on December 21, 1992.

II. SCOPE

INPUT can provide the items marked "A" on Attachment 2 by January 15, 1993 and items marked "B" by February 15. INPUT is not proposing to supply the item in "C" for reasons of time and cost. (These dates assume an authorization to proceed by January 4, 1992.)

The quantitative items can be provided in detail through 1997. INPUT will provide indicative numbers through 2000.

III. FEE

"A" Items

INPUT's professional fee for the study will be \$14,000.

One-half of INPUT's professional fee for the study (\$7,000) is due and payable upon authorization of the study; the remainder at the time of the presentation of results.

Out-of-pocket expenses (telephone, production, and travel) are expected to be minimal and are included in the fee.

"B" Items

INPUT's professional fee for the study will be \$23,000. (This is additive to "A" above.)

One-half of INPUT's professional fee for the study (\$11,500) is due and payable upon authorization of the study; the remainder at the time of the presentation of results.

Out-of-pocket expenses (telephone, production, and travel) are expected to be minimal and are included in the fee.

This proposal will remain valid for thirty days, unless extended in writing.

To authorize the study, please check the option(s) you wish to exercise and sign the appropriate block below.

AUTHORIZATION

To authorize the project as specified please check the option(s) you wish to exercise, then sign and return one copy of this proposal, along with the initial fee. Upon acceptance by INPUT, a countersigned copy of the proposal will be returned to Andersen Consulting.

A 2

PRIORITIZED EXPECTATIONS PHASE 1 (QUANTITATIVE)

Phase 1 - Quantitative Research

Completion Date 1/15/93

Overall Request: All information generated should only include expenditure estimates from companies greater than 50 million dollars. If this filter criterion of >50 million would require a significant amount of time causing us to miss the January 15 deadline, it would become low priority.

High Priority

User Expenditure Forecast by Delivery Mode and Submode (exhibit D-1) document for the following :

United States:

D-1 for each 2 digit SIC code identified by AC

D-1 for Information Services Market

Europe:

D-1 for Information Services Market (each major country or Europe as a whole)

Asia/Other:

D-1 for Information Services Market (each major country)

Medium Priority

United States:

D-1s for Mfg and Dist industries as a whole (2 of 4 major categories; mfg, govt, fin, dist)

D-1 for industrial, consumer, process/energy groups.*

Europe:

D-1s for Mfg and Dist industries as a whole (2 of 4 major categories)

D-1 for industrial, consumer, process/energy groups.**

Asia/Other:

D-1s for Mfg and Dist industries as a whole (2 of 4 major categories)

D-1 for industrial, consumer, process/energy groups.**

} Not proposed C

A

B

Low Priority

Extend macro numbers (industrial, consumer, process/energy) for countries worldwide to the year 2000.

* AC will provide a list of 2 digit SIC codes that comprise these three groupings.

** We understood from our conversation that these groupings don't exist in your standard database, but projections on these macro level numbers was feasible by Jan 15.

Fax: 201-801-0441

PROVIDING QUALITATIVE INFORMATION ON BUYER VALUES IN THE APPLICATION SOFTWARE MARKET

I. BACKGROUND AND OBJECTIVES

Andersen Consulting needs to understand specific buyer values toward applications software in both the U.S. and Europe.

II. SCOPE

Andersen has identified the following buyer values as requiring research:

- A • What are buyer attitudes (and tradeoffs) between applications software products vis-a-vis services (consulting, professional services or systems integration services)? This can include using/acquiring only products or only services or some combination.
- B - What motivates a prospect to select different combinations or products and services?
- C - To what extent do the selection and acquisition processes differ?
- D - What changes are expected?
- E • What is the acceptability of "black box" solutions in such functional areas as high volume transaction processing, decision support systems, real time applications, groupware, etc.? Is the acceptability of "black box" solutions affected by other factors such as size or importance of the applications, or the familiarity of key decisionmakers with technology?

sample • To what extent are these factors affected by size of company? By type of application?

sample • Are there differences between the U.S. and Europe?

Note: This list may be expanded somewhat at the time of project initiation.

III. METHODOLOGY AND CONDUCT OF THE WORK

INPUT will conduct this study by means of structured telephone interviews in the U.S. and Europe. Seventy-five interviews will be conducted in the U.S. and 75 in Europe. This size sample has been selected so that conclusions can be drawn for medium-sized and large companies in both the U.S. and Europe.

- The European interviews will cover the U.K., France, Germany, Spain and Italy.
- Interviews will be divided between companies in the \$50-150 million revenue range and those larger than \$150 million.
- U.S. interviews will focus on manufacturing firms (including wholesale distribution).
- European interviews will also include the health and utilities sectors.

INPUT will draft the questionnaire for Andersen's review and comments. INPUT will test the questionnaire and adjust it if necessary.

Andersen's sponsorship of the study will not be revealed to respondents. Respondent identities will not be associated with specific data. If Andersen desires, copies of completed questionnaires with identifiers removed will be supplied to Andersen upon the completion of the project. As an incentive to take part, respondents will be offered a summary of the project's results; this summary will be cleared with Andersen before release.

INPUT will analyze the results and prepare a written report.

IV. SCHEDULE

The following shows the proposed timing for the project.

<u>Week</u>	<u>Activity</u>
1	INPUT prepares questionnaire; Andersen reviews
2	Interviewing begins
4	Interviewing ends; U.S. data analyzed
5	European data analyzed; Report prepared

V. FEES

INPUT's professional fee for the study will be \$25,000.

One-half of INPUT's professional fee for the study (\$12,500) is due and payable upon authorization of the study; the remainder at the time of the presentation of results.

Out-of-pocket expenses (primarily telephone and production) are in addition to the professional fees and will be billed at cost. INPUT does not expect these to exceed \$3,000.

This proposal will remain valid for thirty days, unless extended in writing.

AUTHORIZATION

To authorize the project as specified please sign and return one copy of this proposal, along with the initial fee. Upon acceptance by INPUT, a countersigned copy of the proposal will be returned to Andersen Consulting

From: Tom O'Flaherty, INPUT

Subject: "Make to Order" Market Numbers

As we agreed yesterday, I am putting down in writing my understanding as to what your requirements are and how we would meet them. Our target is Monday, March 8; this assumes approval today.

1. We would provide an estimate of the U.S. market size for industry-specific applications software products for 1992-97 for the "make to order" industry group.

This group is defined by SIC code⁵ in the "A", "B" and "C" sheets titled "Expert Configurator Workshop". We would only deal with the totals for the A, B and C groups; we do not think it feasible to try to break this group out further, since even when combined the "Make to order group" criss-crosses so many SICs.

Our estimate would be broken out two ways:

- o For all companies \$50 million and above
 - o For companies more than \$500 million. This group would be a surrogate for the "multinational" group you requested.
2. The figures above would be further broken out by AS/400, UNIX and "Other". ("Other" is the balancing figure so the figures crossfoot.)
3. The attached sketch shows how the numbers would be presented.
4. Our fee is \$3,500.

U.S. Make to Order Industry Specific Software Market Product

Co. Size	1992	1993	1994	1995	1996	1997
----------	------	------	------	------	------	------

MEMORANDUM

DATE: February 2, 1993
TO: Lisa Lane, Andersen
FROM: Tom O'Flaherty
SUBJECT: Qualitative Research

1. **A revised questionnaire is attached.** Most questions have been edited; in addition, question 4 in the prior version has been dropped and a new question 5 has been added.
2. **Methodology**

The two principal assumptions from my standpoint are

- It is important that U.S. and European results can be compared (i.e., similar questionnaires and samples)
- Each "cell" should contain at least 25 respondents (i.e., the minimum size for drawing statistically sound conclusions)

Company characteristics

- A sample of 50 companies in both the U.S. and Europe drawn evenly from Andersen's principal manufacturing and distribution segments
- The overall sample would be divided into companies between \$50-500 MM and those over \$500MM.
- Within each company interviews would be "paired" -- with an IS interview matched by an end user interview, where the end user was in a decisionmaking role. (In some companies users would not be worth interviewing; these would be balanced by multiple user interviews in other companies.) Essentially the same questionnaire would be used for IS and end users.

Interview Plan

For both the U.S. and Europe, there would be 100 interviews, spread over four "cells" large enough to draw conclusions from:

<u>Company Size (\$MM)</u>	<u>Respondent Type</u>		
	<u>IS</u>	<u>User</u>	<u>Total</u>
\$50-500	25	25	50
Over \$500	<u>25</u>	<u>25</u>	<u>50</u>
Total	50	50	100

Limitations of Sample Size

- In both the U.S. and Europe, it will not be possible to make assessments on individual market segments within manufacturing due to sample sizes. (Additional interviewing could be done for specific segments; however, it would need a sample of roughly ten times larger to cover the industry breakouts to the same level as is being done on the quantitative side.)
- In Europe, the 50 companies interviewed would be spread over the 5 principal national markets. At ten interviews a country, it could not be possible to make any meaningful statements about country similarities or differences. Again, in order to do this would require expanding the sample by a factor of five. I don't think this is necessary at this time from an information content standpoint. However, is the country aspect important for "selling" the results internally at Andersen?

Other Issues

I still see telephone interviews as the best way to go from both a time and expense standpoint.

We can conduct the U.S. interviews in 2-3 weeks, with another week for analysis. I would suggest reviewing the data with interested parties at Andersen before preparing a formal report.

The European interviews would take a little longer, depending on the language mix.

I will give you exact times after we have reached agreement on the content and approach.

The additional level of interviewing proposed here would raise the overall price of the study from the previously-quoted \$25,000 to about \$29,000 (plus out of pocket expenses).
